CERTIFICATES

ByteXL

- Full stack development Training – ByteXL

PROJECTS

Dynamics Human Resource- An EMPLOYEE MANAGEMENT SYSTEM

- Designed and developed a full-stack Employee Management System to streamline HR tasks like onboarding, leave management, payroll, and performance tracking.
- Built responsive web interfaces using HTML, CSS, JavaScript, and React.js for HR and employee portals.
- Implemented backend services with Node.js and Express.js, enabling secure CRUD operations on employee records and leave requests.
- Managed data using MySQL, ensuring real-time updates and reliable storage of employee information.

Farm-tech

- Developed the frontend interface of a group project, *Farm-Tech*, a smart farming system by machine learning for crop yield prediction management.
- Built responsive and intuitive UI using HTML, CSS, and JavaScript ensuring accessibility across devices for rural users.
- Integrated with backend ML-based APIs to display predictive insights on crop health, pest risks, and resource optimization.

Java-script based projects

- Built interactive web apps including a **Random Password Generator**, **Quiz App**, **Age Calculator**, and **Basic Calculator** using **HTML, CSS, and JavaScript**.
- Focused on **DOM manipulation, input validation, and responsive design** to enhance user experience and functionality.

LANGUAGES

Gujarati, Hindi, English.
